

ÉCOLE
RIVIERA
SWISS BILINGUAL SCHOOL

AT **RIVIERA** SCHOOL, TEACHING IS FOCUSED NOT ONLY ON KNOWLEDGE BUT ALSO ON THE SKILLS NEEDED TO FACILITATE THE DEVELOPMENT OF EACH CHILD.

I respect others, the world around me and myself

Respect, to allow each child to develop positive relationships with family, friends, teachers and the world around them. Acceptance towards others, each child will be able to affirm their differences and uniqueness.

I am curious and I am developing research and investigative skills.

Investigation, because in a world where information is readily available in large quantities, the ability to organise, analyse, plan and collect the right information is paramount.

I make firm decisions and overcome obstacles to apply and succeed.

In our school, we highlight the Vigour displayed by our students and reinforce this attitude positively as soon as we can because it is the drive of any successful and sustainable actions or learning.

I think and act alone according to my personal principles and judgments.

Independence, "Learning to Learn" is a primordial quality throughout our life and a student who develops a certain independence will develop curiosity and intellectual creativity.

I am sensitive to the feelings and experiences of another person.

Teaching Empathy is very important because it allows our students to build strong relationships with their peers and teachers and thus reinforces a sense of security for learning in the school. This reinforces tolerance for others and reduces the risk of bullying in our school.

I am honest and I am responsible for my actions and those of my peers.

Responsibility, as we implement it in Riviera, allows students to become aware of their duties, to accept the positive and negative consequences of their actions and to be aware of them.

I take on challenges, adapt to changes and explore new ideas alone or cooperatively.

Becoming an Adventurer in their intellectual and physical life is an essential value of our school. We push and help students to engage in new challenges, explore new ideas and make decisions with confidence; no matter how important they are because there is no small victory.
